The Role of the Jirga's, Loya Jirgas and councils in Afghanistan

The tradition of the Jirga in our country has an historical background. Our fathers used these valuable and useful traditions through the history; as well as there were needed to form the National power together and secure public’s benefits with the development of social life and creation of political systems, of ancient Aryana.

So this was the only reason of extension of formation of public associations. And because of this purpose Jirga’s are not only regional resolution centers but as time needed they are playing their roles to solve important and national valuable issues.

These Jirgas and national meetings are the important elements of development of political and social life in ancient Afghanistan and they have the high and valuable position in our social and political life up to date.

So Jirga’s in emergency cases with their special properties had played their roles a law and social institutions to organize social life and solve the political and social problems.

One of main properties of Afghans’ national Jirga’s to the length of the history is lack of influences of the elders in the functions of the Jirga. It means that National Jirgas have never come under pressure of the great people.

We mentioned that not even social issues but social judiciary issues had been solved by these Jirga's.
These national and regional Jirgas are in over their history especially in 19th century and after that has played their positive and influenced role to save and get independent of the country and fight against foreign forces attacks on the country.

For example we can say the Jirga was hold on 1841 against British occupation so Mirwas khan Hotak's Jirga was against Gurgeen and Iranian crucial, which its result was the establishment of the first national regional government in 1709 and in 1747 Jirga which was held on October which Mr. Ahmad khan Abdali was elected after nine days discussion among the members it was held in to the building of Shir Surkh shrine inside the military building of Nader Afshar.

And also in 1709 those Jirgas which are formed the powerful state under Merewais Khan Hotak's Chairmanships. These traditions were not only socially important but religiously were also valuable for Afghan nation.

As in Islam religion the importance of Jirgas and councils are limited which in holy Quran the speech of Allah (G) at assembly chapter in 53 holy sign about the importance of Jirgas and councils that how the Jirgas can solve and make the living system of human society.

Those thing which are added on the importance, historical and living of these Jirgas and assemblies in length of the history of our country, those parts comparative instruction and its approve, which we were the witness of Loya Jirga in our country, that the decision and approval of them, bring and create serious and voluble deference's at social live of our people.

Which not only its secure and keep the independence from all our territorial, but in selecting the way and the system of our society which by approving of constitution and its guarantee it played its valuable role and the resulting of this voluble and acceptable culture, which to secure democracy and adjudication of our people rights were to create the National Assembly and senate session.

At last the session of the House of people was called National Assembly and the (the House of Elders) was called the senate session that now both of them are called (National Assembly) as mentioned, that National Assembly and senate session were created for the first time in our country (1931) and as a regular and with out any pause its going on up to 1936 which after the impression state stroke and changes before unbelievable time suffered and accept subject stagnation.

As all of us are in brightness which by restitution independence of our country and to working on reforms by Excellency king Amanallah khan created the voluble legislatives and development in Afghanistan.

But nearly it become under the interference from the both side.
Until the Amani's government drawn and Habibullah Kalakani's bad and anarchy terms began to its work.

And the abrogation, legislative and the ignore and darkness covered allover the country until after lots of victims, fighting then they give end to Amanis' term which by coming the jurisdiction of Excellency Md.
